

First name:	Surname:	Brief overview of your background and experience in this SIG subject matter: (maximum 150 words)	What motivated you to put yourself forward for election to the APM Risk SIG committee? (maximum 150 words)	What qualities, skills and experience do you think you'll bring to the APM Risk SIG committee? (maximum 150 words)
Mark	Augustine	<p>As I am a structural engineer with almost 7 years of experience my fundamental approach has been to mitigate risks and design complex infrastructure projects to withstand any catastrophic conditions either due to external loading or internal instability. In all these years while designing sleek designs for architects I have avoided several flimsy profiles to make the structure perform efficiently for a design life of 50-120 years. Similarly, in several cases, the clients would demand unusual engineering profiles and in all these cases I have provided robust designs to reduce the impact of risk from sudden catastrophic collapses. The most important aspect of my experience is I have always identified, handled and controlled these risks at a very early stage of the project (with several disciplines) to ensure project costs are optimal. Lastly, I developed a risk register/repository for concrete structure based on the projects in the last 5 years.</p>	<p>First and foremost I would like to share my knowledge of risk management in the complex infrastructure project to ensure the project costs are within the budget and timeline. Secondly, I would like to be a part of the PRAM guide and add certain special parameters for high-value infrastructure projects such as the HS2. Thirdly I am an ardent learner and would like to learn the emerging practices in several other industries and the complexities faced by project managers in managing risks. Lastly, I would like to organize conferences & networking events, write blogs (as blogging is one of my hobbies) and meet people!</p>	<p>I am a curious individual and this quality has paved the way for solving several challenging problems in the infrastructure domain. Similarly, I am a fast-paced perfectionist with greater attention to detail therefore I would take a careful approach and at the same time be bound to stringent timelines. Further, my effective critical thinking would facilitate solving several pain points in risk management. Subsequently, I have two masters in the field of Structural Engineering and Business Administration (both with distinctions) and my engineering experience range predominantly in high-value projects with project values ranging from £5 million to £300 million (and above). In addition to it, I am currently working on the most iconic and prestigious infrastructure project in the UK which is HS2. Therefore a combination of all my skills,</p>

				qualities and experience would certainly add value to the committee, particularly in the high-value infrastructure projects.
Robert	Balaam	I have firmly established myself as a leading professional in Risk Management, Schedule Management, Cost Management, and Programme Analysis & Reporting, with extensive knowledge, experience, and insight across many industries & sectors. I have specialised in Risk Management and Risk software over the last 10 years, and transformed and implemented many new innovative risk processes, techniques, and insights. I have performed many major risk software implementations and upgrades on many major programmes, and was guest speaker at the SWORD GRC ARM North America Conference 2019 in Washington DC. I am now at the 'cutting edge' of Integrated Cost & Schedule Risk Analysis, and also involved with AI and emerging technologies.	I have been on the APM Risk SIG Committee since 2021. I pride myself in being a very active and supportive member, with a very high meeting attendance rate. It has been a fantastic experience to be involved with the APM Risk SIG Committee and work with the great committee members, and I am extremely motivated to remain to strengthen the events and offerings provided. I would also like to continue to promote and further advance APM Risk for all members, risk professionals, and the wider project community.	I have been on the APM Risk SIG Committee since 2021. I have specialised in Risk Management and Risk software over the last 10 years, and transformed and implemented many new innovative risk processes, techniques, and insights, for which I hope I can produce and facilitate articles, presentations, and white papers for members, risk professionals, and the wider project community. I am at the 'cutting edge' of Integrated Cost & Schedule Risk Analysis, and also involved with AI and emerging technologies, and would like to continue to work with APM Risk SIG members to review, assess, discuss, develop, and provide guidance on these.
Chris	Blockley-Webb	I have been working in risk for over 10 years (10 yrs in a senior role) and am currently the AH Risk for the MoD. I work on various committees and working groups with risk, sadly, not only my job but also my hobby.	Having worked with the RISK SIG for two years, with one year as a full committee member I now feel more confident to take on the Chairpersons mandate further and help others who are "new joiners".	I have over 10 years in senior Risk Management roles and currently sit on BSi RM1, 31000, 31010 and Guide 73 as well as ISO /TCT 262/WG8. I am also a Train the Trainer and BSi Chair (& IRM SIG

				Chair) with experience in different committee settings. I am also involved in the SIG conference management team.
Estelle	Detrembleur	First and foremost, I am an advocate of continuing to progress the risk management field and challenge projects and organisation with poor risk management culture. I particularly focused this year on the early stages of risk management on projects i.e risk maturity, risk culture and infrastructure. I am looking for new challenges in spreading the greatness in applying Risk Management at all level. I'm passionate about supporting the development of professionals and the project management profession. Term 2022/23 here I come!	I found the SIG very vibrant and supportive in all the initiatives. I have been involved with the SIG for the past 7 years and would like to continue to share knowledge, experience and 'expertise' across industries. Managing risk correctly on projects has always been a challenge and in the current economy risk management is even more at the centre of the discussions. I have participated to event with universities and organisations throughout the year. My main motivation is to support the risk management community by sharing best practices. I would like to continue my contribution to technical papers, conferences, webinar to advocate risk management as a life skill.	I have some experience in governance, project management, risk and quality management. My experience of working with the private and the public sector will help in shaping the risk approach we recommend to members. I am very collaborative in working with others to achieve common goals and sharing ideas. I recognise the need to inspire people with risk management capabilities as well as driving innovation and creating an environment where career progression is open to all.
Stephen	Hardy	I have over 15 years' experience delivering complex large scale transformation portfolios, programmes and projects across the financial services and market data providers.	Since joining the APM I've been looking for an opportunity to play a more active role within the APM, its branches and the various specific interest groups. I'm looking to help shape the future of the APM and the project management profession by sharing what I have learnt from 15 years in the industry and look forward to learning more from other like-minded project professionals.	I have an in-depth understanding of the various Project Management methodologies, the challenges faced by senior management and delivery teams and industry best practices for ensuring projects are delivered on time, within budget and to agreed levels of quality. As a project management professional, I have experience across the full

				spectrum of project management activities and responsibilities from Strategy, Governance, Execution and Capabilities that help deliver change from start to finish; planning, resourcing, finances, risk, change control, stakeholder management, quality assurance, Management reporting and everything in between.
Sara	Hasani	Sara specialises in Project Management with interests in Risk and the application of decision making tools and techniques in disaster management. She has been teaching risk management for the past 11 years, involved in the risk SIG for the past 4 years and have co-authored and peer-reviewed 3 chapters of newly coming PRAM guide. She has also written Variety of courses and modules in risk management in postgrad and undergrad levels as well as CPD and ad-hoc trainings.	I believe I bring a research informed view from academia and bridge the risk within the industry with freshly graduated risk manager	Sara Hasani (PhD, FHEA) is a senior lecturer in project management in the Department of Business and Enterprise, School of Business. She specialises in Project Management with interests in Risk and the application of decision making tools and techniques in disaster management. Sara has more than a decade’s experience in various positions from supply chain manager of an automotive manufacturer to performance consultant of a worldwide distribution network of medical equipment amongst others, in addition to PhD in the highly analytical field of Decision Sciences in Operations Research, along with educational background in Economics, management and research. She has designed variety

				<p>of new modules in Project Management and Operations Management in undergraduate and postgraduate level as well as new postgraduate courses in Risk management for both UK and overseas institutions. Her professional experience also fits well within her academic work and the existing team of academics. She has extensive international experience in different industries, embarking as a customer account executive of a multi-national transportation company and moving to the supply chain executive of the biggest automotive manufacturer in Middle East as well as executive consultancy in the area of performance and collaborative efficiency to international medical equipment supply networks with offices in UK, Netherlands, UAE and Turkey in addition to pro-bono consultancies to UK-based charities.</p>
Paul	Lane	<p>I have been a serving Risk SIG committee member since Sept 2021. I have experience in very large operational and consultancy projects across my 30+ year career. As a ChPP holder I have a passion for the development of the profession and</p>	<p>I have been serving as a committee member since Sept 2021, and at a time when the world has been battling with a global pandemic and adjusting to a new norm. I want to continue to bring by practical experience and the lessons of</p>	<p>As a Chartered Project Professional, I have the experience to continue the development of the SIG's support of project managers at all levels, providing easily understandable risk management solutions that can be applied to</p>

		would like the opportunity to continue contributing to the Risk SIG to ensure the development and delivery of risk management solutions that can be applied to small projects as well as the mega projects.	the last two years to the enhancement of the project risk management profession	small projects as well as the mega projects.
Darren	Mullan	I have been a project and risk professional for over 20 years, with experience across a number of sectors.	I have been a member of IRM SIGs for several years. I recently supported the APM Risk SIG with the rewrite of the PRAM guide, and I am keen to see how else I can support this SIG.	I can bring insight from a number of sectors, as well as from an international perspective (have been in the Middle East for the last four years).
Gareth	Pugsley	I have taught it for 2 years at post and undergraduate apprentice level as well as studying risk for my Doctorate and publishing an academic paper on this subject	I ant to help push the concept of risk and help it be better understood and learn from others	I bring experience in risk assessment during my service with the RAF as well as studying the subject
Peter	Simon	I have been working in and around project risk management for 35 years. I have co-authored the book 'Practical Project Risk Management', which is now in its third edition.	I am current Chair of the Risk SIG and would like to serve for one more year in order to see through the initiatives I have started. If elected, I will not be standing for Chair.	I am quite good at organising people and getting things done.
